Letter from the Editor

Dear Educators,

Earlier this year, citizens of Tunisia, Libya, Egypt and others organized themselves to challenge their governments in what came to be referred to as 'The Arab Spring'. Tens of thousands of people, determined to gain the freedom to participate in democracy, fought their respective government-backed militaries. Unfolding on our television screens and across the internet, we witnessed their struggle. Many lives were lost but they persevered and achieved their goals. One can only stand in amazement to realize that a mere 8 months later, the first of the countries to rise up, Tunisia, held its first democratic elections. Something that seemed improbable, if not impossible at this time last year, has had a major impact on our world.

During this same time period, Canadians have gone to the polls several times -- federally, provincially and municipally -- to choose their leaders. Yet it often happens that barely half of our eligible voters exercise this vital democratic right. They cynically say that voting doesn't matter; more specifically that their one single vote will not matter. The results of our elections show that that is not true. Federally, there has been a sea change and recently, Ontario elected a minority government which is deficient of a majority by a single seat.

On November 11, Canadians across our country marked Remembrance Day, reminding us of the lives that have been lost and that continue to be lost to protect our rights and freedoms. There is no greater right than voting. Voting does matter. It can and will shape Canada's future. There are still too many Canadians who do not take the opportunity to exercise this most democratic of rights. The 'election mobs' phenomena earlier this year were encouraging among young people but there's still a long way to go before their voices are fully heard. This week's **Chalk Talk** features free classroom resources and programs from **Elections Canada**.
